Audio Description Basics

Did you know that you can watch movies and TV shows using Audio Descriptions?

Audio Descriptions describes what's happening on the screen and reads titles and captions. Just set your **Audio Descriptions** setting to **Autoplay**. Try it out!

Audio Descriptions Setting

1. Open your **Settings** app and go to **Accessibility**.
2. Right swipe until you reach **Audio Descriptions**. VoiceOver tells you that it's currently turned off.
3. Double tap to open **Audio Descriptions**. The focus is on the **On/Off** toggle button.
4. Double tap to turn **Audio Descriptions** on. Now, anytime you play a movie or a TV program with this feature, **Audio Descriptions** will automatically play.

Tip: For more information about how to find audio described movies, check out the workshop on Audio Descriptions in iTunes for some helpful tips on how to search for and download tons of audio described movies.

Now that you know how to turn on Audio Descriptions, check out the other workshops in this series to learn more about the entertainment features on your device.
