

## Customizing Windows for Low Vision

# Identifying the Operating System

1. Select the **Start** button or press the **Windows** key to open the **Start** menu.
2. Enter **System** in the **Search** box.
3. Select **System Information**.
4. At the top of the window in the right pane, you can check which edition and version of Windows your device is running.
5. For information regarding your system type, look for **System type** in the list to see if you're running a 32-bit or 64-bit version of Windows.
6. Select **X** in top right corner to close.
