

Android Low Vision Features

Accessibility Button and Menu

The **Accessibility button** is a shortcut that allows you to quickly turn on accessibility features.

The **Accessibility menu** is a large on-screen menu that lets you control device options, like adjusting the brightness and volume, opening Google Assistant, opening the accessibility settings, and much more. **Try out these steps!**

Accessibility Button

1. Go to your device's **Accessibility** settings and select a feature.
2. Tap on the shortcut, if available, and select the **Accessibility** button.

Tip: By default, the size of the button may be small and floating somewhere on the screen.

Changing Accessibility Button Defaults

3. Open **Settings**. Select **Accessibility** and then **Accessibility Shortcuts**.
4. Tap the **Accessibility** button.
5. Tap **Location** to choose how you want to see the accessibility options:
 - **Floating** over other apps: Tap the **Size** option to make the **Accessibility** button larger. Tap the **Fade when not in use** option to fade the button onscreen after a few seconds so items are easier to see. Set the button transparency using the slider bar.
 - **On the Navigation bar**: The **Accessibility Settings** icon appears as the **Accessibility button** at the bottom right corner of the screen. So, you will have four buttons on the **Navigation bar** instead of three.

Accessibility Menu

6. Open the **Settings** app.
7. Tap **Accessibility**, and then **Accessibility Menu**.

8. Tap **Accessibility Menu Shortcut** to turn it on.
9. Tap **Allow** at the bottom of the screen, to allow the **Accessibility Menu** to have full control of your device.

Tip: It's necessary to choose Allow for accessibility features to function.

10. Tap **Accessibility Menu Shortcut**.

Tip: Tap on the text, not the toggle button. Tapping the toggle button turns this feature on and off.

11. Select an option for quick access to the **Accessibility Menu**.

- **Accessibility button:** Tap the Accessibility button on your screen.
- **Hold volume keys:** Press and hold both volume keys.

Tip: You can choose one or both shortcuts.

12. Select **Accessibility button**. Then select **Save** at the bottom right of your screen to set your shortcut.

Make Accessibility Menu Buttons Larger

13. Open the **Settings** app.
14. Scroll to **Accessibility**.
15. Select **Accessibility Menu**.
16. Tap **Settings**.
17. Tap **Large Buttons** to turn them on.

Using the Accessibility Menu

18. Tap the floating **Accessibility** button on the screen.
19. Choose an option on the menu.
20. Go to the next screen or previous screen to find more menu options.
