Apple TV

VoiceOver: On and Off

Here's a simple way to turn VoiceOver on and off on your Siri Remote.

VoiceOver is Apple's screen-reading software. If you aren't familiar with some of the basic VoiceOver gestures for navigation, check out the Hadley workshop on basic VoiceOver for the Apple TV. **Now try out these steps to help you begin using your Apple TV.**

1. Use your Siri Remote to activate Siri and turn on VoiceOver. Hold down your Siri button to activate Siri.

Tip: If you want to get familiar with all your Siri Remote's buttons and functions, you may find the Hadley workshop on using the Siri Remote for the Apple TV useful.

2. As you hold down your Siri button, say, “Turn on VoiceOver.”
3. To turn off VoiceOver, hold down your Siri button again and say, “Turn off VoiceOver.”

You are now ready to explore your standard Siri Remote gestures to move through your Apple TV. With VoiceOver on, information will be read aloud to you as you navigate your Apple TV. How about trying another video or handout like this one to enhance how you use your Apple TV?
