

Siri

## Siri for Alarms

You can easily set an alarm using Siri.

With Siri as your personal assistant, you don't have to worry about oversleeping. Simply ask Siri to set an alarm. **Give it a try!**

**Tip:** Siri is usually turned on during the setup process for your device. But if you haven't yet set up Siri, contact a Hadley learning expert for help.

**Tip:** To get the most interaction from Siri, make sure VoiceOver (Apple's built-in screen reading software) is running on your device. If you're not familiar with VoiceOver, check out the Listen with VoiceOver series.

### Using Siri for Setting an Alarm

1. Say, "Hey Siri" or "Siri." Then say, "Set an alarm for 6:00 AM."
2. Siri responds, "I turned on your 6:00 AM alarm." Your alarm is now set.

### Using Siri to Cancel an Alarm

3. To cancel your alarm, say "Siri, turn off my alarm."

4. Siri responds, “I turned off your 6:00 AM alarm.”

**Now you know an easy way to set an alarm using Siri. Give another workshop a try to see how you can use Siri for the weather.**
