

iPhone/iPad VoiceOver

Two-Finger Gestures

You can quickly move through your device with two-finger gestures.

Use these two-finger gestures to move through your device with ease. **Try these seven gestures out!**

Tip: The following instructions are for the iPhone. However, they are very similar whether you're using an iPhone or an iPad.

Tip: Keep in mind your fingers need to be separated about half an inch so the device recognizes the gesture correctly.

1. **Two-finger single tap** pauses or continues the playback of VoiceOver.
2. **Two-finger swipe up** starts VoiceOver reading at the very top of your screen.
3. **Two-finger swipe down** starts VoiceOver reading from where you currently are on your page.
4. **Two-finger double tap** to do things like answer and hang up phone calls, start and stop video playback, begin and end new voice memo recordings, start and stop the stopwatch, and play and pause audio apps.

5. **Two-finger triple tap** opens or launches your item chooser, which allows you to search for any item on your device.
6. **Two-finger scrub**, like drawing a “z”, to do things like close a pop-up menu or go back to a previous menu or screen.
7. **Two-finger quadruple tap** opens or launches your most-frequently used VoiceOver settings, so you can swipe through the quick settings to make any changes.

Now you have a simple way of quickly moving through your device with two-finger gestures. Give them a try, and then take another workshop to learn more about using your device.
