

Siri

Siri for Weather

You can easily check the weather using Siri.

Sometimes you want to quickly check the weather to know if you need to grab your umbrella or a light jacket on the way out. **Try using Siri to check the weather.**

Tip: Siri is usually turned on during the setup process for your device. But if you haven't yet set up Siri, contact a Hadley learning expert for help.

Tip: To get the most interaction from Siri, make sure VoiceOver (Apple's built-in screen reading software) is running on your device. If you're not familiar with VoiceOver, check out the Listen with VoiceOver series.

Using Siri to Check the Weather

1. Say, "Hey Siri" or "Siri." Then say, "What's the weather outside?"
2. Siri will tell you the weather for your current location.

Tip: You can also ask Siri to give you the weather for the next few days or even the whole week.

Now you have an easy way to check the weather using Siri. Give another workshop a try to see how you can optimize how you use your device.
