

Mac Low Vision

Adjusting the Range in Zoom Styles

Set the magnification range in **Zoom Styles** to quickly jump to your preferred magnification levels when zooming in or out.

1. Open the **Apple** menu and select **System Settings**.
2. Select **Accessibility** from the left panel.
3. Next, select **Zoom** on the right and scroll down to **Zoom Styles**.
4. Select the **Advanced** button.
5. Scroll down to **Set Range for Rapid Zooming In and Out**.
6. Use the mouse or track pad to adjust the **Maximum Zoom** slider to the highest magnification level you want to use when activating the **Zoom** feature and zooming in.
7. Then adjust the **Minimum Zoom** slider to the lowest magnification level you want to use when zooming out.
8. Select **Done** to close the window.
