

Seeing AI with VoiceOver

Additional Document Features

Seeing AI can do more than just read scanned documents. Here are some additional useful features to try.

Sharing a Document

1. Double-tap the **Share Text** button located at the bottom of the screen, near the center.
2. Select the desired format of your document from the following choices: **Share Image**, **Share Text**, or **Share HTML**.
3. Share the document via your desired application, such as **Messages**, **Gmail**, **Google Drive**, or **Photos Upload**.

Ask AI a Question About the Document

4. Select the **Ask Seeing AI** button in the bottom right corner of the screen.
5. Type your question into the edit field at the bottom of the screen.

Tip: You can ask for more details, such as a summary of the text, or questions about a specific section in the document. You can also dictate your question by selecting the **Dictate** button located at the bottom of the screen at the far right.

6. After typing or dictating your question, select the **Send** button, just above the onscreen keyboard, to send your question to Seeing AI. Your responses will be displayed in text and read aloud.
7. Select the **Back** button in the top left corner two times to return to the home screen.

Scanning and Reading More Pages

8. After scanning and reading the first page, select the **Add Pages** button at the top of the screen. It is located to the right of the **Page 1 of 1** title.
9. Repeat scanning and reading the next page.
