

Container Gardening

A Safe Garden Space for Low Vision

A few tips to help you work safely in your garden:

- Keep pathways uncluttered to prevent trips and falls.
- Use adhesive strips of a contrasting color and different texture to show where a deck or patio begins and ends.
- Paint the edges of steps or rails in a contrasting color.
- Avoid heavy lifting. Use a plant-mover trolley when moving plants, or use a rolling planter.
- Consider a pulley system for lowering hanging baskets. This will make watering and deadheading easier.
